

HESHAM ALI

AI AUTOMATIONS ENGINEER / JUNIOR SOFTWARE ENGINEER

I turn messy business processes into practical automations, integrations, and scalable web systems.

Alexandria, Egypt | +20 112 140 8868 | heshamali.dev@gmail.com | heshamali.com | GitHub | LinkedIn

PROFILE

Early-career software engineer focused on AI automation, system integrations, and scalable web solutions. Strong at understanding unclear business problems, mapping the process, and building a practical system that teams can use and maintain.

EXPERIENCE

Junior Software Engineer | [Moraqmen](#)

Jan 2026 - Present

- Built API integrations, workflow automations, and client-facing web features.
- Developed WordPress and Salla websites and online stores for different business needs.
- Used AI tools and agents to speed up research, troubleshooting, and solution delivery.
- Applied backend and scalability fundamentals when improving websites and systems.

SELECTED PROJECTS

[mithaq.life](#) / [Scalable WordPress Multisite](#)

- Built custom WordPress plugins for a multisite setup, with dedicated plugin behavior for each site.
- Designed for high traffic and reduced conflicts between users and site-specific functionality on a platform serving 1M+ users.

[hrexpertclub.com](#) / [Performance & Recovery](#)

- Took ownership of an existing HR community platform with major inherited issues.
- Fixed legacy problems and improved website performance, stability, and maintainability.

[sho9.com](#) / [Salla Store Delivery](#)

- Delivered store setup, custom theme sections, integrations, testing, and launch preparation.
